

FOR IMMEDIATE RELEASE

Boost your performance at the UCAM Learning Seminar

Ucamco is delighted to welcome PCB CAM engineers to its upcoming Learning Seminar, to be held on Wednesday 14th and Thursday 15th September, 2011 at the Lea Marston Conference Centre, Birmingham Airport, UK

Gent, Belgium – August 18, 2011 –

- *Are you getting the most out of your pre-production CAM Department?*
- *Do your engineers have the right tools?*
- *Do they know how best to use them?*
- *Do they know how to use the latest developments in your UCAM software to maximum effect?*

If you are in PCB manufacture, chances are that your CAM department is under a great deal of pressure. Which means that your engineers simply have no time to look into the new developments - often supplied under the maintenance contract - that will help them to increase efficiencies, boost throughputs, and make their lives a whole lot easier.

That's why we at Ucamco are offering our first UK-based UCAM Learning Seminar

During this event, we will show your engineers how to get the most out of their UCAM systems, sharing with them our know-how, techniques and tips on how to optimise their processes and increase throughput and yields. Equally important, they will be able to exchange experiences, issues and solutions with industry colleagues who share the same challenges they face day after day. Through demonstrations, discussions and interactive seminars, participants will learn about the easy-to-use solutions offered by our latest UCAM 9 software, and version 6 of Integr8tor, our automated input and analysis engine. This includes a powerful Visual Scripting tool that allows UCAM's automation to be tailored quickly and easily to your specific business needs. During the event we will also explain how to use high-efficiency features such as

- True Etch Compensation
- Solder Mask optimisation
- Geometric Correction
- Integr8tor automation
- Fast, accurate quoting

We will be unveiling some significant future developments such as Multi Core and Multi Threading capability that will boost your CAM efficiencies even further. Which all makes the UCAM Learning Seminar a must for your engineers, for your CAD department, for your business. *So reserve your place now !*

About Ucamco (www.ucamco.com)

Ucamco (former Barco ETS) is a market leader in PCB CAM software and laser photoplotting systems with a global network of sales and support centers. It is a sister company of Gardien, see www.gardien.com. Ucamco has more than 25 years of continuous experience in developing and supporting leading-edge photoplotters and front-end tooling solutions for the global PCB industry. Key to this success has been our uncompromising pursuit of engineering excellence in all our products. More information at www.ucamco.com
