

Ucamv9.2.2

++ CAM power
++ CAM performance

Dear Customer,

Ucamco is proud to present Ucam v9.2.2.

This version again brings major improvements to "Visual HyperScript", our new scripting environment that delivers higher productivity without the need for specialist programmers or long implementation cycles.

Visual HyperScript Scripting Language

Now includes:

- More Operating System commands
- New Soldermask Optimizer, Draw Slots, AutoFixture, View Grid commands
- New Plot Parameter commands
- Updated User Manual with more demo scripts
- Updated API Specification with more examples
- All manuals integrated into Ucam Help

Bug fixes and small enhancements

See UCAM Help on Version v9.2.2 for more details
